Note ¹Revenue includes RM69 million (RM17million each for Q1 2024 to Q3 2024; RM18million in Q4 2024) in interest revenue, which represents the significant financing component of device bundled contracts allowing customers to pay for devices over up to 36 months. In the current financial period, the interest revenue has been reclassified to revenue to provide a clearer representation of the revenue arising from the Group's ordinary activities.

(a) Comparison against preceding quarter (Q4 2024 vs Q3 2024)

The Group's total revenue remained stable at RM3 billion, driven by growth in all core revenue segments except Prepaid. Subscriber growth of 1.3% in Postpaid and 14.2% in Home and Fibre, along with increased roaming and bulk SMS usage, helped offset the softening in Prepaid revenue. Total costs increased by 8.0% or RM130 million, primarily due to higher device costs driven by increased sales volume, higher site rental and network maintenance expenses, and increased dealer incentives in line with sales growth.

EBIT and PAT decreased by 57.5% and 63.4% or RM443million and RM279million respectively. These decreases were mainly attributable to ROU impairment charges of RM217million and accelerated depreciation from the revision of the useful life of ROU asset of RM113million, following an impairment assessment of network sites. The impact on PAT was partially mitigated by the reversal of and over-provision of tax for FY2023.

#### **B1.** Review of Performance (Cont'd)

(b) Comparison against corresponding quarter of preceding year (Q4 2024 vs Q4 2023)

Total revenue remained stable with increased device revenue, strong Postpaid revenue performance supported by subscriber growth, and consistent double-digit growth in the Home & Fibre segments, where subscribers reached 209k, reflecting a year-on-year increase of 78k. However, growth was moderated by a strategic shift away from one-time prepaid SIM acquisitions, SIM consolidation, and the impact of regulated rate reductions on interconnect revenue.

Total costs increased by 4.1% or RM69 million, primarily driven by higher device costs from Postpaid re-contracting activities, rising 5G access costs, fibre-related expenses to support expanded fibre sales, increased Opex from higher site rental and network maintenance costs. As a result, EBITDA declined by 4.3% or RM68 million.

EBIT was further impacted by impairment and accelerated depreciation of ROU assets for network sites, while the impact on PAT was partially mitigated by the reversal of an over-provision of tax for FY2023.

(c) Comparison against preceding year (YTD 2024 vs YTD 2023)

The Group recorded a total revenue of RM12.7 billion, maintaining consistent performance compared to the previous year. Postpaid consumer revenue grew with subscriber growth, while the Enterprise mobile segment saw a decline in subscriber base. Home & Fibre achieved a 28.4% revenue increase, reaching 209k subscribers. The Wholesale segment remained stable, with higher hubbing, lease line, and solution revenue offsetting the end of a domestic roaming arrangement since December 2023. Overall, revenue growth was constrained by fewer rotational one-time SIM acquisitions and SIM consolidation following the merger.

Total costs rose by 5.7% or RM371 million, primarily due to higher roaming traffic and device sales, along with increased lease line and fibre-related expenses to support traffic and Home & Fibre growth. Additionally, the increase was impacted by non-recurring credit adjustments in opex from the prior year, mainly related to credit loss allowances as well as additional costs from a voluntary separation scheme in Q1'24.

EBIT decreased by 13.4% to RM2,328 million, reflecting a margin of 18.4%, primarily due to the flow-through impact of higher costs, including the impairment and accelerated depreciation of ROU assets on network sites, partially offset by the reduced depreciation impact, as assets affected by changes in useful life post-merger were fully depreciated by early 2024. PAT was RM179 million lower than FY2023, with the decline partially mitigated by lower taxation due to the reversal of an over-provision of deferred tax liabilities and the provision for green tax incentives during the year.

Revenue Ratio	

<sup>&</sup>lt;sup>1</sup>To accurately reflect CelcomDigi's underlying performance, EBIT growth guidance excludes any material non-recurring and extraordinary items for both FY2024 and FY2025.

CelcomDigi remains committed to distributing dividends at a minimum of 80% of its PAT, subject to the availability of its free cash flow and distributable reserves, to be paid quarterly and ensuring sustainable dividend payout.

### **Accounting Policy**

The Group uses derivatives comprising foreign currency forward contracts and interest rate swaps to manage risk exposures related to changes in foreign currency and interest rates.

#### (a) Foreign currency risk

The Group enters into foreign currency forward contracts to minimise its exposure to foreign currency risks as a result of transactions denominated in currencies other than its functional currency, arising from the normal business activities in accordance with the Group's hedging policy. In line with the Group's hedging policy, hedging is only considered for firm commitments and highly probable transactions of which hedging shall not exceed 100% of the net exposure value. Firm commitments are netted-off against receivables denominated in the same currency, and only the net exposures are hedged so as to maximise the Group's natural hedge position. As at 31 December 2024, all foreign currency forward contracts have been exercised.

#### (b) Interest rate risk

The Group manages its interest rate risk by having a mixed portfolio of fixed and floating rate financial liabilities that is consistent with the interest rates profiles acceptable to the Group. To manage this, the Group enters into interest rate swaps, in which the Group agrees to exchange, at specified intervals, a fixed interest rate for floating rates.

The Group uses interest rate swaps to hedge the fair value risk in relation to the fixed interest rates of Sukuk with notional principal amounts of RM475 million. The interest rate swaps entitles the Group to receive interest at a fixed rate ranging from 3.50% to 4.65% per annum, and in return, pays interest quarterly at floating rate plus a spread. The swaps mature at varying dates based on the maturity of different tranches of Sukuk.

Speculative activities are strictly prohibited. The Group adopts a layered approach to hedging, where a higher percentage of hedging will be executed for closer-dated exposures and with time, increase the hedge as the probability of the underlying exposure increases. The derivatives and their underlying exposures will be monitored on an on-going basis.

#### **Credit Risk Management Policy**

Foreign currency forward contracts and interest rate swap transactions are executed only with creditworthy financial institutions in Malaysia that are governed by appropriate policies and procedures.

There were no changes in the cash requirement of, nor the policies governing the derivatives since the end of the previous financial year ended 31 December 2023.

Derivatives are stated at fair value which is equivalent to the marking of these derivatives to market, using prevailing market rates. Derivatives with positive market values (unrealised gains) are included under assets, whereas derivatives with negative market values (unrealised losses) are included under liabilities in the statement of financial position. Any gains or losses arising from derivatives held for trading purposes, or changes in fair value on derivatives during the financial year that do not qualify for hedge accounting are recognised in profit and loss as disclosed in Note B14.
